

Swakop Uranium, a Namibian world class uranium mining company, invites people who are self-motivated, energetic and wish to work in a High Performance Culture environment, to apply for the following role.

Process Control Technician

**Location: Husab Site
Reports to the Superintendent C&I**

MAIN PURPOSE OF JOB

To maintain the Plant Process Control System for maximum availability and productive Process Control. This includes the maintenance activities for the Process network and equipment connected to this network, as well as the maintenance of all process changes as described in Process changes requests.

Key Performance Areas:

- Ensure that duties are carried out in accordance with safety and quality standards as well as inspection regulations of the Process Plant.
- Ensure a detailed commissioning is done on all changes that are done through the Change Management Program.
- Ensure all documentation for interlock testing is done and signed off.
- Ensure site programming standards are followed and all documentation is up to date.
- Management of changes to be followed and guide all involved to follow the management of change standards.
- Interaction with SCADA operators and metallurgists to ensure good process control standards and quality for system.
- Anti-Virus updates to secure process network, manage all network connectivity to ensure security principles are followed.
- Ensure all redundant equipment is available for failover and perform regular tests to ensure uptime on process control system.
- Ensure data accuracy and availability.
- Ensure regular audits are carried out and version control on Rockwell Software.
- Design and construct special apparatus and fixtures and prepare specifications and estimates for construction, repair and installation projects.
- Check new received equipment for compliance to specifications.
- Understand and schedule compliance problems experienced with a task and take appropriate action.
- Contact dealers on equipment warranties and prepare cost and material estimates.
- Revise, submit and control annual working cost budgets in area of responsibility in consultation with relevant persons.
- Liaises with, establishes and maintains professional relationships with internal and external stakeholders.
- Adheres to company Safety, Health, Environment and Radiation standards.

Requirements and experience:

- N6 with an Instrumentation/Electrical Trade Certificate, **or**
- National Diploma obtained through T3/S4 in Control & Instrumentation.
- Minimum 5 years post-trade experience in Instrumentation or Electrical field working in a Mining Plant Process Control environment, of which 3 years should be as Process Control Technician.
- Experience in Rockwell Process Automation.
- Valid Code B/BE Driver's License.

Through its commitment to its people, the company offers a competitive remuneration package and the opportunity to work alongside some of the most experienced and dedicated people in the industry.
