

Swakop Uranium, a Namibian world class uranium mining company, invites people who are self-motivated, energetic and wish to work in a High Performance Culture environment, to apply for the following role.

Superintendent: Central Workshop

**Location: Husab Site, Swakopmund
Reports to the HOD Project**

MAIN PURPOSE OF JOB

To co-ordinate, direct and supervise activities of different Engineering and Maintenance Workshops on the mine in order to support safe production and maintenance activities of the many facets of the mining and processing units and other support facilities at Husab Mine.

Key Performance Areas:

- Co-ordinates and directs the installation, repair and maintenance of machinery, pipe work systems, and activities on the mine.
- Directs repairs and refurbishment of equipment, machinery and valve parts for a variety of equipment and operational units utilizing a variety of machinery equipment including lathes, milling, boring, drilling, lapping and balancing machines, and a wide range of precision measuring instruments to achieve acceptable standards for workmanship.
- Participates, as a member of a team, in any project and activity requiring workshop assistance such as the construction or fabrication of new steel or concrete structures, offices or roads required on the mine.
- Reviews production processes and procedures continuously to ensure that all work conforms to the approved specification in order to be able to provide any technical support detail as and when required by the specialist contractors on site.
- Assigns work with appropriate instructions to subordinates personnel, arranges and ensures inspection and certification are done as per standard procedures.
- Engages occasional contacts with equal level personnel at Swakop Uranium for exchange of information, and maintains regular contacts with contractors at manager level regarding execution of maintenance contracts.
- Prepares schedules, inspects vehicles, diagnoses fault and approves the replacement of faulty parts within guidelines of written procedures.
- Showing respect for the value of individual differences and adherence to Swakop Uranium's (SU) committed policy of fair dealing and integrity in the conduct of its business.
- Complies with Company job safety and good housekeeping standards/practices at all times.
- Safety, Health, Environmental, Radiation & Quality Effectiveness.

Requirements and experience:

- Bachelor of Science/Bachelor of Engineering or Bachelor Technology in Mechanical and / or Electrical Engineering.
- Knowledge and experience in maintenance and operations of Heavy Mining Equipment (HME) and Process Plant Infrastructure
- Minimum 7 years' experience in diverse metal trades including machine tooling, bench fitting and fabrication welding & repair, preferably within a heavy industrial or mining environment along with 3 or more years supervisory experience/exposure.
- Experience in project management, budget preparation, execution, management of equipment suppliers.
- Valid Code B/BE Driver's License.

Through its commitment to its people, the company offers a competitive remuneration package and the opportunity to work alongside some of the most experienced and dedicated people in the industry.
