MAIN PURPOSE OF JOB

To develop and maintain a comprehensive Quality Management System and coordinate the activities required to meet quality standards and regulatory requirements, monitor and advise on the performance of the Quality Management System.

Key Performance Areas:

- Contribute towards the development, implementation and maintenance of a comprehensive Integrated Management System (IMS), SHEQ Audits and Program, by:
 - Establishing Swakop Uranium quality policies and procedures.
 - Reviewing the implementation and efficiency of quality and inspection systems.
 - Planning and performing safety, health, environment and quality audits.
 - Coordinate and executing quality support, communication, induction and training program.
 - Facilitating Swakop Uranium (SU) quality objectives and targets.
- Liaise with other staff throughout the organisation to ensure that the quality system is functioning properly and assists with conducting Quality risk assessments.
- Interpret and implement Quality Management System standards.
- Set up and maintain controls within processes.
- Conducts performance and regulatory compliance audits.
- Prepares and submits audit reports.
- Ensures compliance to corporate policies, regulations or legislations, standards and industry best practices in Swakop Uranium's (SU) environments.
- Ensures that a suitable auditing criteria is kept up to date and in line with regulatory, permit and industry association changes.
- Coordinate a comprehensive risk profile based on quality audits of business processes relative to SU.
- Reports on the performance effectiveness of the audit process and development of reporting tolls and KPI's for the department.
- Assist in Identification of key risk factors and assists in Due Diligence evaluations.
- Develops group standards to support legislation changes and industry association requirements.
- Conducts and follows-up safety and quality results of any aspect of related operations and makes recommendations that will help Swakop Uranium (SU) to achieve its objectives.
- Compile audit findings and assist departments to determine root cause and corrective actions.
- Assists and / or participates in quality related incident investigations, find the root cause and defines corrective and preventative actions.
- Ensure ongoing compliance with quality and industry regulatory requirements.

Requirements and experience:

- B Degree in Quality and Assurance or equivalent.
- Quality certificate.
- IMS Internal auditing course certificate.
- Minimum 5 years general Safety or Quality Management Systems experience of which 2 years must have been in Quality Audit.
- Quality assurance training experience.
- Experience in the Mining industry working will be an added advantage.
- Valid Code B/BE Driver's License.

Through its commitment to its people, the company offers a competitive remuneration package and the opportunity to work alongside some of the most experienced and dedicated people in the industry.
